

EDUCATION

k12 SOLUTIONS

Join the Engaged Learning revolution.

Educational Facilities today are being designed in sharp contrast to those of the past. Flexible and Adaptable Spaces must be utilized throughout the facility to create a more collaborative and engaging environment among students and teachers. This paradigm shift occurring in the educational system is facilitating new methods of learning allowing students to compete more effectively in a national and global economy and marketplace.

OE&S is your trusted advisor and knowledgeable partner through this transformational process.

As a Trusted Advisor, Knowledgeable Partner and Valued Supplier, Office Environments & Services (OE&S) has provided top-level service to Florida Industries including Education: k12 and college/university; healthcare; corporate business; hospitality; GSA; and state and local governmental agencies since 1955.

Our highly skilled team of knowledgeable, experienced and solutions-based professionals are committed to assisting you and your team including facilities management, IT management, architects, general contractors and interior designers with project planning, budgeting, needs assessment, space planning, design assist, furniture and related product specifications, procurement, scheduling, delivery and installation, and service.

The OE&S k12 division provides your educational facility with a complete range of products and turnkey services, from A-Z.

On time, professional, and flawless delivery and installations is the OE&S trademark. We own our warehouse, fleet of delivery trucks and equipment. Our installation team is filled with full-time employees with years of experience in receiving, delivering, and installing furniture and related products. Each installer is a team member with a positive can-do and helpful attitude.

“We deliver **results**, not surprises!”

The OE&S k12 COMMITMENT

You will work and collaborate with a team of experienced professionals dedicated to a solutions-based approach to your project. We will listen, understand your objectives, and develop a plan that best suits your needs.

Our team will provide assistance with project planning, budgeting, needs assessment, space planning, design assist, furniture and related product specifications, procurement, scheduling, on time delivery, flawless installation, and top-level service.

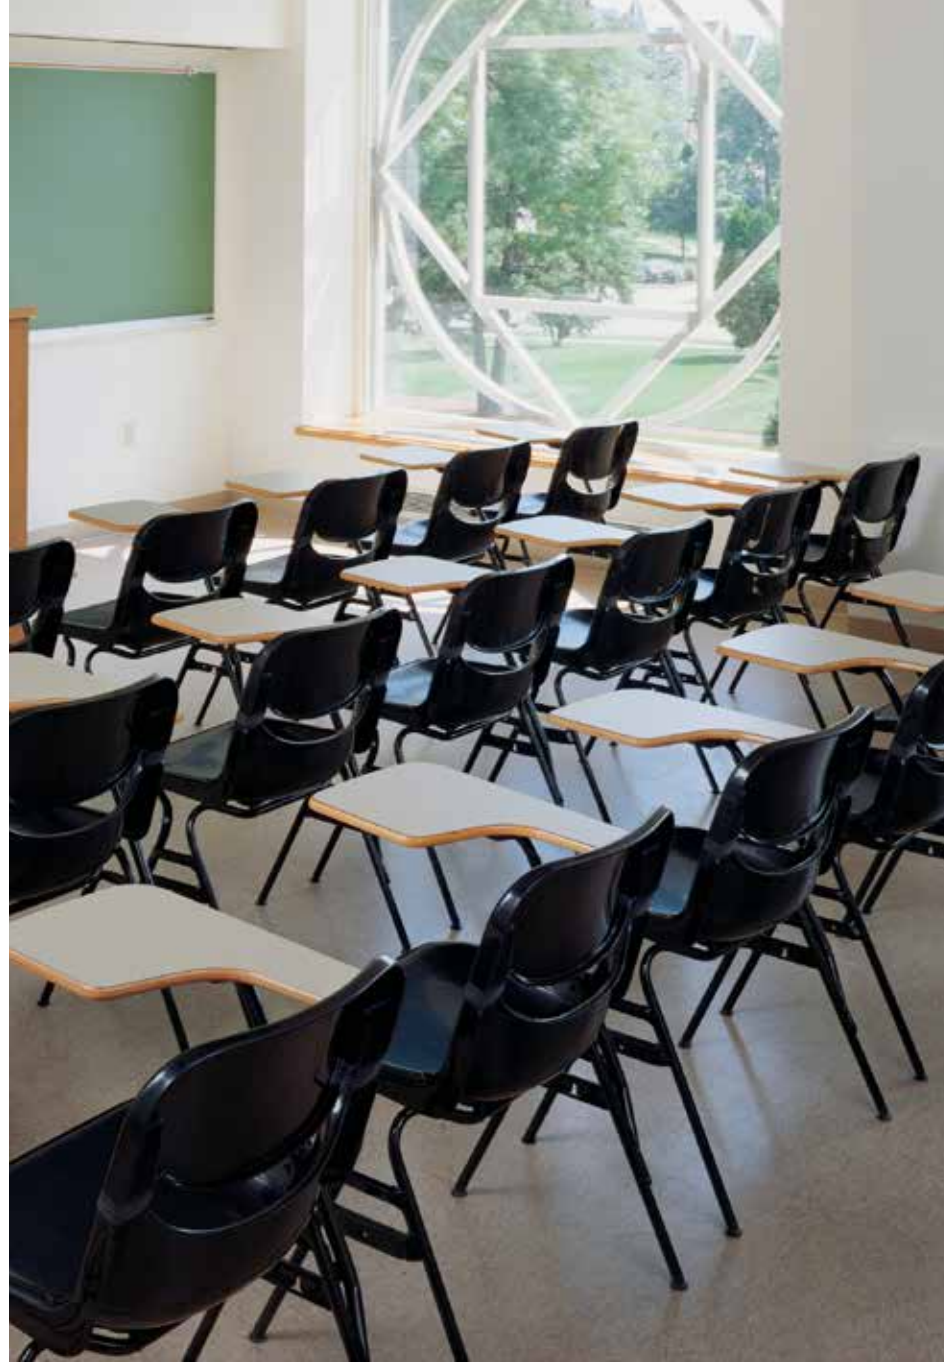

We understand the importance of communication throughout the entire process and are committed to attending all required meetings, following up on all related tasks, and keeping all parties informed and updated.

“We deliver **results**, not surprises!”

OLD STYLE CLASSROOMS

The “old” teaching method was to put all the students into rows of tablet arm chairs facing forward while having them listen to a 50 minute “lecture” from the teacher taking notes. This promoted conformity, closed communication systems, and a single way of thinking.

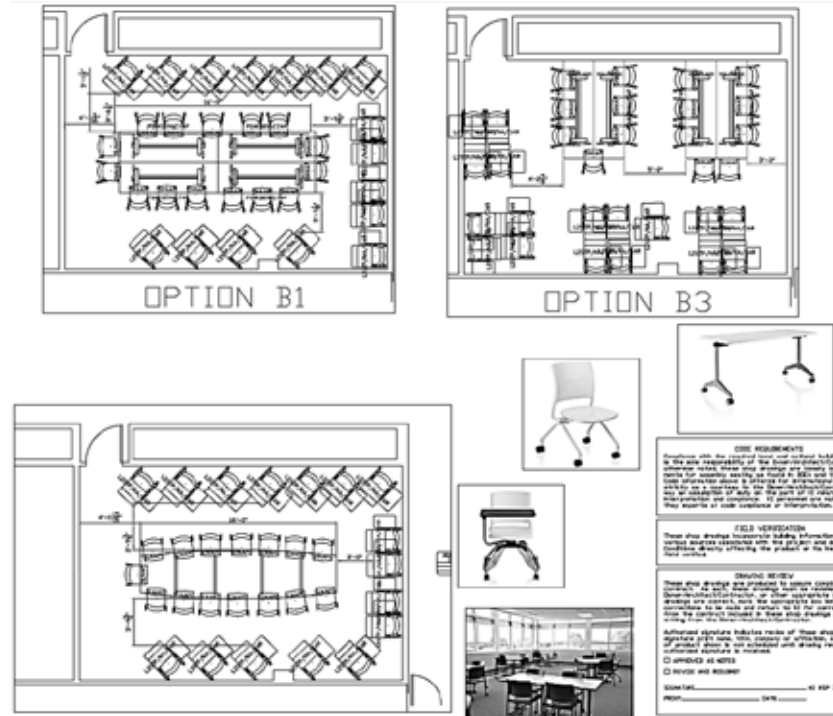

NEW STYLE CLASSROOMS

The “new” teaching method has the teacher as the “facilitator” mobilizing students into engaged groups and teams learning from collaboration and interaction. Technology is an integral part of the instruction today so classrooms have to be flexible and adaptive yet technology friendly and integrated. This style promotes critical thinking, an open systems approach, and the principle of equifinality.

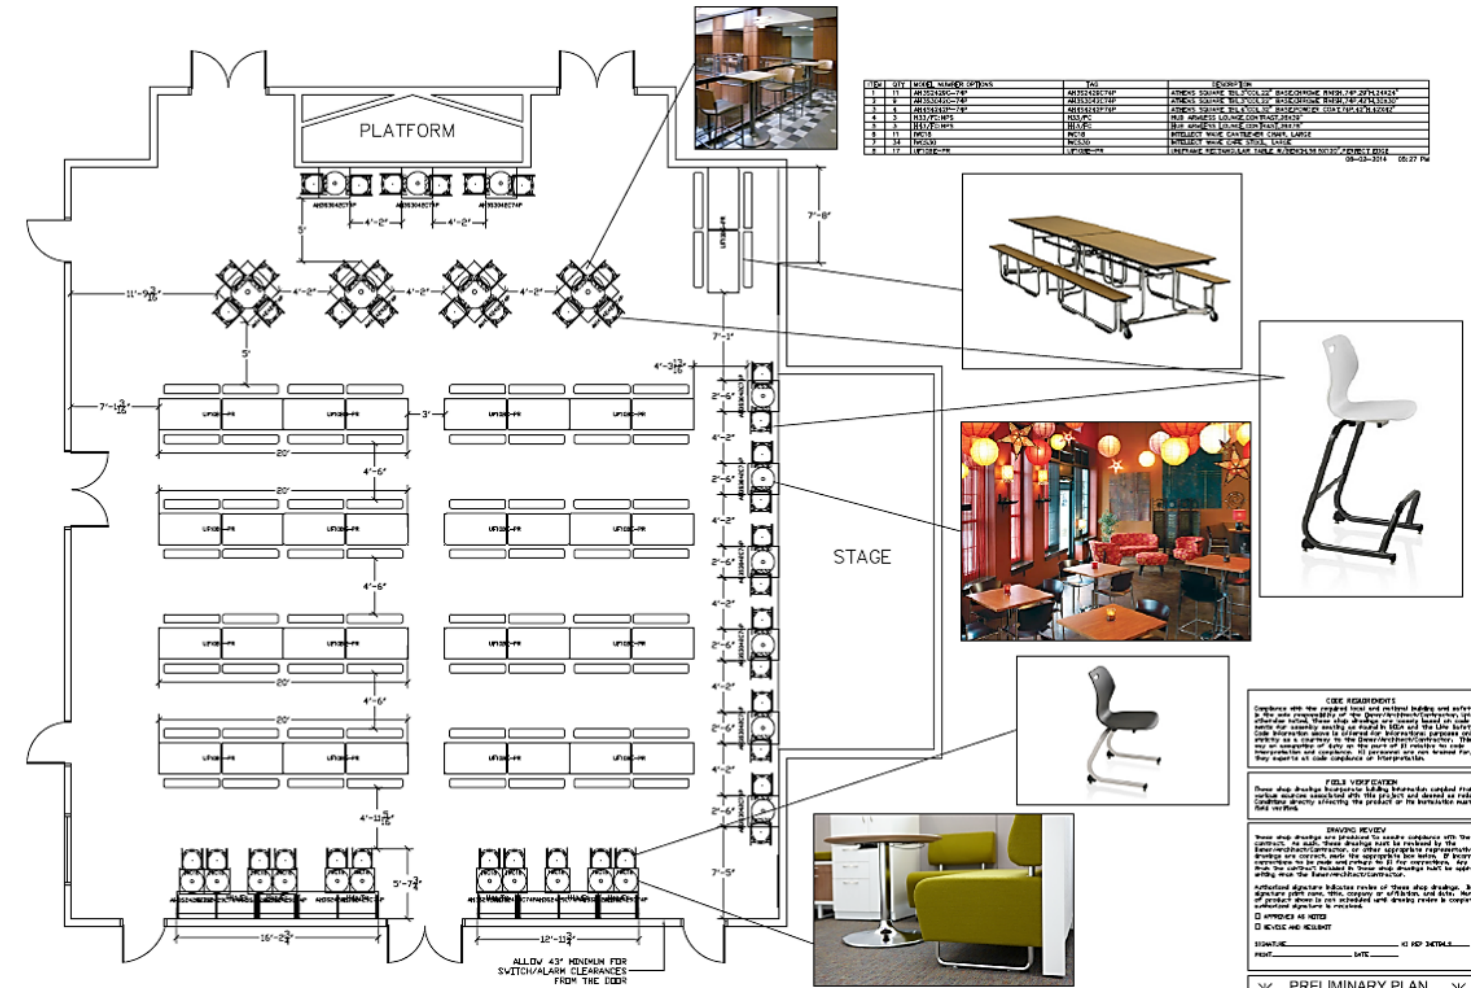

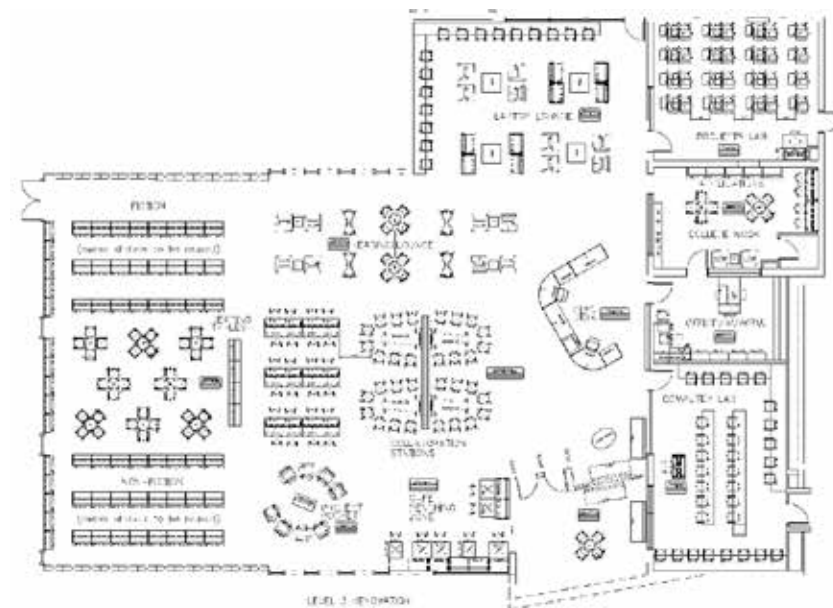

FLOORPLANS, SPACE PLANNING, DRAWINGS, AND FINISH BOARDS

Classrooms needing maximum flexibility can utilize furniture for ease of mobility and reconfiguration. By using a floor plan of the classroom, we are able to create drawings demonstrating how the furniture we specified will fit into the space and can be reconfigured to meet different classroom configuration requirements. We provide this service for our clients, and as a design assist to the project architect and interior designer.

This drawing is of a library and media center. We work with the client to space plan and design how they ultimately want their space to function, flow, and look.

Space planning for a cafeteria is essential. By knowing how many students need to fit into this space, we can help by determining what layout is appropriate to use, and which type and style of tables and chairs are available to meet the student count objective, while creating an open, well-designed, and inviting space.

Once the floor plan is created and we space plan the furniture layout, we work with the client to develop the furniture styles, colors, materials, and finishes for a complete and finished interior design. The finish board is a visual presentation we put together for the client to review and approve.

CONVENTIONAL CLASSROOMS

While Engaged and Interactive Classrooms are currently the “New” Style being incorporated into today’s k12 schools, Conventional Classrooms still have a place in specific applications.

BLENDED CLASSROOMS

This classroom style utilizes two or more forms of learning formats within one classroom.

DYNAMIC COLLABORATIVE CLASSROOMS

Dynamic Collaborative Classrooms are designed for students to work together on laptops, assignments and a variety of materials they are collaborating on with each other.

FIXED SEATING CLASSROOMS

Fixed seating ensures uniformity, neat room appearance, and easy maintenance.

FIXED-FLEXIBLE COLLABORATIVE CLASSROOMS

Fixed-flexible spaces combine the right balance of static and dynamic. Rotating seats enable student interaction and collaboration. Fixed bases maximize student capacity and maintain an uncluttered room appearance.

TECHNOLOGY INTEGRATION

Technology is an integral part of the instruction today so in addition to classrooms having to be flexible and adaptive, the furniture must also be technology friendly and integrated. Furniture outside the classroom such as libraries, media centers, and conference rooms must also now integrate technology and electrical in lounge seating, occasional tables, and conference tables.

SCIENCE CLASSROOMS & LABS

STEM is gaining in significance and importance in educational curriculums. Updated and well-designed science labs are necessary for student success and learning objectives.

FIXED SEATING: LECTURE HALLS AND AUDITORIUMS

Fixed Seating: Lecture Hall and Auditorium furniture provides an organized and orderly room appearance, uniformity, and easy maintenance care.

LIBRARY AND MEDIA CENTERS

Libraries are no longer quiet rooms filled with shelves of books. Today, libraries have expanded into media centers and are a primary hub of student activity and meeting spaces. Shelves are lowered and fewer in number, lounge seating is used throughout, creativity and inspirational labs, collaborative labs, computer labs and presentation rooms are now being designed into these spaces, as well as cafés.

STUDENT COMMON AREAS

Students are meeting in small to large groups and collaborating wherever they can find a space to get together. This includes lobbies, corridors, stairways, virtually everywhere. With space at a premium, well thought through design needs to include common areas throughout the entire educational facility.

LOCKERS AND BENCHES

Create a professional look with lockers, available in either metal or laminate, while providing maximum storage, strength, durability and stability. Offered in a wide range of styles, paint colors, laminate choices and options. Benches are available in heavy duty, standard duty and aluminum pedestal styles.

CAFETERIA, CAFÈ, AND AUDITERIAS

Dining spaces in educational facilities have grown to include cafeterias, cafès and auditerias (a space used as both a cafeteria and auditorium). Space planning and design has become important in creating a warm and inviting environment but also able to accommodate the number of students needed to seat. Flexibility to convert this area for other uses is an important consideration too.

FACULTY OFFICES, WAITING AREAS, MEETING AND CONFERENCE ROOMS

The educational facilities' offices, waiting areas, meeting and conference rooms impact the school's image and perception to the parents, students, public and faculty. Well designed, efficient work spaces help to improve performance and morale.

EARLY LEARNING

Early Learning spaces demand high quality, safety-focused, appropriate sized heavy-duty furniture yet offer function, creativity, imagination, and color.

EARLY LEARNING

EARLY LEARNING

FOLDING CHAIRS

Folding chairs are used throughout the entire facility. Metal, upholstered, and chairs with school logos are available in many paint colors, storage caddies and styles.

FOLDING TABLES

Folding tables are versatile and can be used in many areas within the facility. Dining, classroom, multi-purpose rooms, just about anywhere. They are available in a lightweight style, many different sizes and shapes, laminate choices, storage caddy designs, and additional options.

FLOOR-TO-CEILING MOVABLE WALLS

Floor-to-Ceiling Movable Walls are a smart choice in dividing space using walls. With the ability to move and reconfigure with ease, movable walls eliminates the need to tear down drywall, work around construction dust, replace carpeting, ceiling tile and paint. Available in glass fronts; white boards; fabric, vinyl or laminate; movable walls can be changed around in a day and minimal time. Ask about how you can use it to depreciate over 7 years, rather than 30+ years as fixed drywall. We can educate you on all the many benefits this product offers you and your facility.

PARTITIONS

Partitions are an affordable, movable divider when you do not need a full wall.

MILLWORK

Millwork enables you to design your own piece of furniture in any size, any design, anything you want. From reception desks, break room cabinets, student health clinic cabinets, to display boards, kiosks, and anything else you can imagine.

HIGH DENSITY MOBILE FILING

A storage system that offers high-density, mobile and convenient filing.

SITE FURNISHINGS

Every project requires site furnishings...from trash receptacles, recycle bins, to bike racks, playground equipment, planters, benches, picnic tables, and much more. We provide it all for you.
